Profile

Results-oriented Full Stack Web Developer with a proven track record of designing and maintaining web applications from inception to deployment. Successfully reduced page load times by 30%, driving a 20% increase in user engagement. Skilled in integrating third-party APIs to enhance website functionality and improve user experience, resulting in a 15% boost in customer retention. Proficient in leading developer teams to deliver projects on time and within budget, increasing client satisfaction ratings by 25%. Strong expertise in user-friendly interface design and website performance optimization.

Work experience

Junior Full Stack Web Developer

2024 - Present

Personal Projects

- Amazon Clone – Developed a fullstack e-commerce application with a Firebase-based payment system and authentication, allowing users to securely browse, add to cart, and complete transactions.
- Netflix Clone – Built a fullstack application with API integration to simulate Netflix's browsing and streaming experience, showcasing my proficiency in React and back-end API management.
- Evangadi Forum – Built a fullstack question-and-answer platform where users can sign up, post questions, and provide answers in a secure environment.
- Apple Home Page – Recreated the Apple home page using Bootstrap, ensuring a responsive and pixel-perfect design across devices.
- Apple Fullstack Application – Developed a fullstack application using React, integrating both front-end and back-end technologies to create a fully functional experience.
